JIGSAW24

Lyndon School

New Mac Media suites

When Lyndon School in Solihull contacted us for help with setting up a new media suite, we put together a team of our consultants to work with them throughout the project. Olan Adeyemi, the school's ICT Manager, tells us how everything went...

"When we wanted to set up a number of new Macs for a media suite at our school, we got in touch with Jigsaw24. We worked with a team of three of their consultants – Rob Williams, Tom Holbrook and Chris Reynolds – who talked us through our options and came up with solutions for what we wanted to achieve.

Best performance and reliable backup

"They looked at our requirements and suggested iMacs combined with Apple's Xserve to give us the best performance without taking up too much space. They also advised that the PresStore Backup solution would be a good choice for us because it would give us the reliable backup we needed for all our students' creative work.

"On top of this, the Jigsaw24 consultants recommended some educational software that they thought we'd find useful in lessons. Now we use our suite of 27 iMacs to teach our students on programs like Comic Life, Adobe CS4, QuarkXPress and Kudlian's I Can Animate.

> **66** We are all very happy with the results; the new Macs are in constant use and the system works really well. We will definitely be contacting Jigsaw24 for any future consultancy we need at Lyndon. **99**

> Olan Adeyemi, **ICT Manager, Lyndon School.**

"Rob, Tom and Chris were very friendly and helped us at every stage of the project. They even supported us after the initial consultation, answering all of our questions whenever we needed something explaining. As an ICT Manager, some of my questions were quite technical and in-depth but they answered everything I asked very clearly and gave me even greater confidence in their ability to do the job."

For more information about Macs in your classroom, get in touch with us on the details below.

Working with...

LYNDON SCHOOL
HUMANITIES COLLEGE

In a nutshell...

Who are Lyndon School?

Lyndon School are a Foundation School and Humanities College in Solihull, serving pupils aged between 11 and 16.

What did they need?

A collection of Macs to add to their media suite, plus backup and storage solutions to ensure students' work was kept safe.

How did Jigsaw24 help?

We suggested iMacs combined with Apple's Xserve to give Lyndon School the best performance without taking up too much space. We also set them up with PresStore to manage their backup and a range of educational software to help kick start media creation, including Comic Life, Adobe CS4, QuarkXPress and Kudlian's I Can Animate.

What were the benefits?

- Lyndon School's students now have access to the latest hardware and software for multimedia work, including industry standards like Adobe Creative Suite.

- Staff have a reliable backup management system that drastically reduces the chance of students losing work before exam day!
