

CPD: Continuing your professional development

Why is continuing your professional development so important?

- **Training is fundamental in supporting the continued personal enhancement of your teaching and learning skills by gaining new knowledge.**
- **Training helps you keep up with the current curriculum and climate, as teaching practices are constantly evolving.**

So we'd like to invite you to sign up for CPD sessions with our own **Apple Professional Development Trainers**. Our CPD is an **ideal way of getting the best possible**

training on implementing Mac and iPad into the classroom, and making the most effective use of them, whatever level your staff are at. The sessions are **completely flexible** – we can tailor training for end users' needs, with subject-specific techniques, and even sit in on lessons post-training to provide helpful advice.

We've included some of our top training courses inside, but don't hesitate to get in touch for our full range of CPD training!

Our top CPD training courses

We've picked out a few favourites from our extensive range.

1 Using assessment tools on iPad

This course allows teachers to gain experience using iPad to develop different activities, ideas and tools based around assessment for learning strategies. The course aims to help educators who are already familiar with iPad learn how to use teaching and learning apps to embed assessment strategies into their classroom. The activities and ideas can then be adapted to different student groups and curriculum areas.

Key areas covered:

- Ideas for starter activities.
- Assessing pupil progress.
- Using iPad for Exit Ticket activities.
- Assessment workflows using iPad.
- Other apps to support assessment.

Recommended app
Socrative

Some of our CPD feedback...

"Brilliant session and great delivery from Paul Ford! He has coped really well with a very energetic group! He was very informative, attentive and patient to answer ALL questions."

"I feel like a techno wiz for the first time in my life."

"I want more help. It's addictive."

2 iPad in the computing curriculum

This course allows participants to learn skills, explore activities and investigate lesson ideas that will help them deliver the new 2014 computing curriculum using iPad. The workshop identifies apps and workflows that promote relevant skills, such as logical thought, creating simple algorithms and developing computer programs. Fortunately, due to the intuitive nature of iPad and the design of the apps involved, no previous experience in programming is needed, and the course is suitable for staff with any level of computing experience.

Key areas covered:

- Understanding algorithms.
- Basic programming.
- Understanding programming language.
- Intermediate programming.
- Advanced techniques and coding.

4 Using iPad to increase productivity

iPad supports teaching and learning, but it can also be an incredibly effective tool to help increase productivity. This course allows participants to explore how to use iPad for daily school operations and management, discovering features and functions by exploring relevant apps and taking part in hands-on activities. The workshop also allows staff time to practise using apps relevant to their requirements in areas such as planning, presentation and observation.

Key areas covered:

- Using built-in tools in iPad to support SLT.
- Communication tools in iPad.
- Presenting on iPad.
- Documents on iPad.
- Learning walks and lesson observation tools.

3 Creating digital textbooks for Mac and iPad

This course introduces iBooks Author for Mac, an intuitive tool that allows teachers to create their own multitouch textbooks for use on iPad and Mac. Participants will explore how to import existing teaching materials (whether they be Word or PowerPoint format), use templates to create new materials and add features such as animations, multimedia elements and review tools for assessment.

Recommended app
iBooks

Key areas covered:

- Exploring iBooks Author features, including:
 - Importing existing teaching resources.
 - Creating interactive images and galleries.
 - Adding videos and audio (great for narration and 'read aloud' functions).
- Review tools.
- Animation using Keynote.
- Publishing to iBooks.
- Exporting to the web.

5 Planning and vision for iPad

A successful iOS initiative relies on everyone having a shared vision and a clear plan to achieve it. The aims of the deployment need to be carefully stated, with realistic targets, measurable outcomes and a continuous focus on teaching and learning rather than technology. In this course, designed for school leadership, you will review the appropriate pedagogy, analyse relevant case studies, review your current plans and create an action plan for your iOS deployment. You will look at ways of presenting plans to a range of stakeholders, including parents, teaching staff and the governing body.

Key areas covered:

- Reviewing pedagogy.
- Evaluating case studies.
- Adapting existing plans.
- Preparing for challenges.
- Planning for success.
- Presenting your vision.

Our full catalogue of courses

As well as the top five we've picked out, we offer a full catalogue of courses covering the whole curriculum (you can find this at Jigsaw24.com/cpd), including content creation and a huge range of subject-specific sessions.

If you need further help with computing and creating content in the curriculum, we can also provide information through the Rising Stars Switched on Computing scheme.

- + Making movies on Mac with **iMovie**. Discover how you can use Mac to edit, title and transition like a pro.
- + Creating lesson resources with **iTunes U**. How to create and manage exciting and engaging courses for your students.
- + Sharing content with **Showbie**. Collect, review and distribute pupils' work directly on iPad.
- + iPad in English, Maths, Science, PE and Design & Technology.

Ready to continue your CPD?

How to book your batch of CPD sessions.

1

Choose your training

Want something not featured here? Download our full training catalogue at Jigsaw24.com/cpd or get in touch to **tailor the perfect sessions** for your needs.

2

Book your training

Full day training sessions cost £650, or we can offer half day or twilight sessions for £325 to suit your budget too. Call the team on **03332 409 290** or email training@Jigsaw24.com to book.

3

Meet the team

Our courses are delivered by our fully accredited **Apple Education Trainers** Mike and Paul, and designed to fit in with your strategic development plans at a time that suits you. As teachers with many years of classroom experience they're ideally placed to help your team get the most from your tech (it helps that they're thoroughly lovely people too!).
